

Trackers in the data room

Embed your checklists directly into Datasite Acquire and simplify your life. Trackers combines the flexibility of a list with our best-in-class analytics and VDR technology. So, you can centralize your to-dos in one place and receive automated status updates in real-time.

Benefit from Tracker analytics

Know where you stand on multiple trackers instantly on our Dashboard. Sort by status and priority. Get a customized report sent automatically.

Link to underlying materials

Leave no room for miscommunications by connecting individual items directly to relevant documents and findings. Jump directly to any list from the Dashboard and drill in.

Personalize and duplicate

Replicate your internal checklists or use one of our templates. Sort and filter easily. Copy multiple Trackers across different projects, or pick and choose the ones you want to move.

Line-by-line control

Make sellers respond to document requests directly in the VDR by leveraging our item-by-item user permissions. Ensure your team sees only what you want them to see.
