# Sharpen your focus

Stay one step ahead of buyers and keep your deal on track with Datasite Diligence analytics. Gauge bidder engagement, monitor team progress, and identify potential issues quickly using our easy-to-understand visuals.

Skip countless reformatting hours with our flexible filters, download options, custom templates, and report scheduling features. Instead, focus on closing that deal.

## Monitor deal progress

- Measure headway with visuals showing user login activity, document access status, and content change history.
- Track team productivity with permissions, Q&A, and redaction dashboards. See instantly how many documents have been redacted, questions answered, and more.

## Drive a more competitive bidding process

- Profile buyer activity, instantly, by logins, top searches, documents accessed and read, and more. Then action.
- Gauge true interest using factors like time-to-data room engagement after events like pitch meetings or new document uploads.
- Spot critical activity changes. Identify the signs of a slowing deal with a fall-off in log-ins. Or detect buyer team turnover with a document-search surge.

## Send status reports, your way

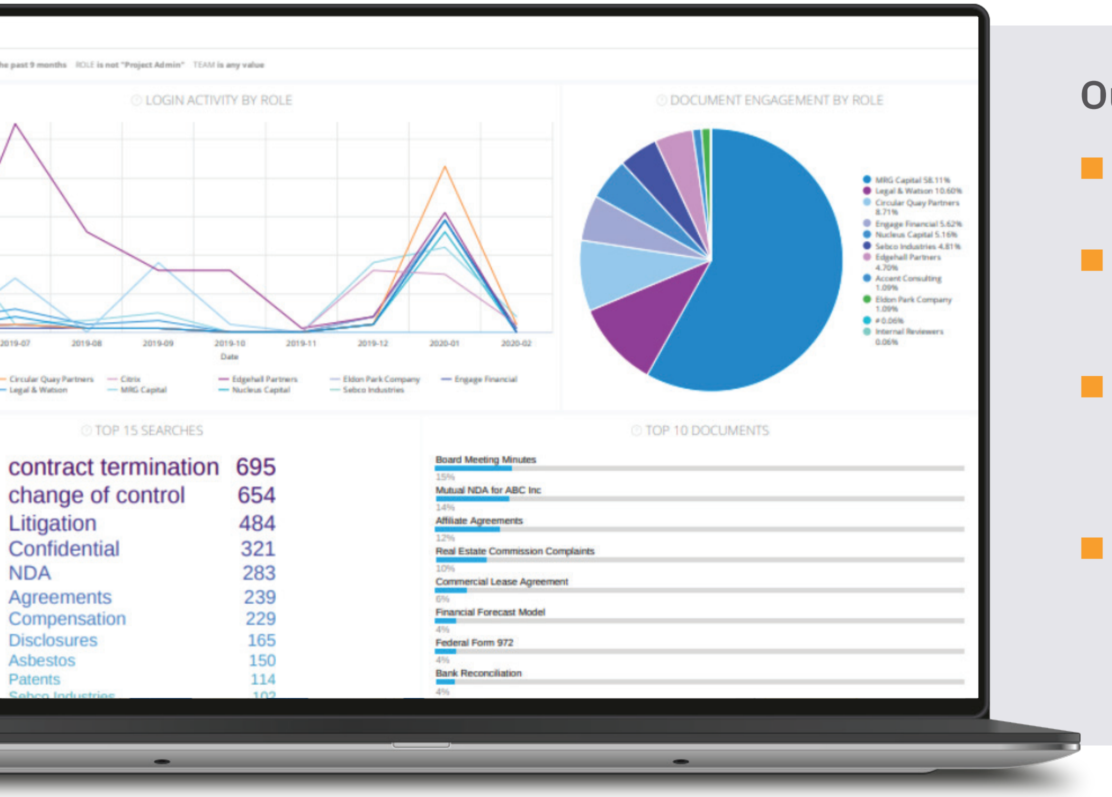
- Download dashboards as PDF or CSV, or share PDFs directly via email. You can even schedule dashboards to be emailed at set times, and put the whole thing on automatic.
- Create a custom dashboard template and skip hours of reformatting time. Pick the data that matters to you, and brand with your logo, colors, and fonts.

**24/7/365** Access to omnichannel support in 11 languages

**9,000+** VDRs opened by our experts during 2019

# Capture actionable intelligence from every angle

Arm your team with multiple dashboards to gain insight into all aspects of the state of deal play. Customize to your needs. Export, or send on your own schedule.



## Our dashboards include:

- **Buyer engagement**
  Track your buyers by key activity metrics and trends.
- **Datasite Diligence**
  See your deal status distilled; summary view includes logins, top searches, documents, and engagement metrics.
- **Documents**
  Track transaction progress through a document lens. View who's accessed what, and for how long, to assess interest and identify trouble spots.
- **Users**
  Follow user behavior. Drill down to see who is active and who hasn't even logged in. Filter by role, user email, date range, user name, and company.
- **Content**
  Monitor content change history, including author dates of changes, change type, and more. Use filters for more focused analysis.
- **Redaction**
  Find out instantly how many documents have been redacted or are in draft, by redactor, folder, and content name.
- **Q&A**
  Learn what questions buyers have asked. Identify key concerns and respond quickly and accurately to everyone who has asked the same question.
- **Permissions**
  Triple-check sensitive information is correctly permissioned by user and role with this comprehensive view.
