

Redaction AI

for Datasite Dilligence™

Redact faster with AI

Go live with buyers twice as quickly, thanks to the best redaction tool available. Datasite Diligence lets you redact and unredact sensitive content in seconds. AI does the hard work - you do the deal.

80% less time vs. manual redaction

50% less time vs. stand-alone tools

Redaction starts as your deal starts

- Just upload files - the AI instantly finds hundreds of information types.
- Your data room has built-in redaction AI - saving you days compared to external redaction tools.
- Redact by individual file, by folder, or by file room.

Easy management and control

- Achieve word-perfect protection of sensitive content to meet global regulations.
- Allow simultaneous redaction by multiple users to get it done even faster.
- Track your redaction program progress with advanced analytics.

Keep deals moving

- The best redaction tool, at a fraction of the cost of an external service provider.
- Unredact in seconds when exclusive buyers emerge. Should the deal collapse, re-redact quickly to restart due diligence.
- Cut redaction time in half - so you can focus your efforts on dealmaking.

No more compliance complaints

Redact personally identifiable information (PII)

Stay compliant and redact PII in a few clicks. The AI finds it all for you: tax IDs, account numbers, contact information and more.

Redaction starts as soon as you upload

Upload content to Datasite Diligence and the built-in AI gets to work, marking potential redactions. Just click to confirm, decline, or change.

Automate redaction of select terms

You can also create a list of specific words and phrases you want redacted.

Redact images, logos, and even handwritten notes

Select special items (e.g. images) with a special area tool, to mark every instance of it for redaction.

Check and confirm redaction draft

You review the AI's suggested redactions and accept or decline them before going live.

Manage overall project redaction

You can monitor redaction activities, including document volumes, top redactors, and team progress. You can also schedule reports.

Tag redactions by reasons

You can set up different reasons for redaction - e.g. strategic, commercial, privacy regulation compliance - and create tags for each. Then, when you find an exclusive buyer, you can unredact exactly what they need to see.

What our clients are saying

(There is) a lot more functionality... substantial additional value.

....an improvement to what we have now for sure.

It's almost like you know someone's gone through it before you, as opposed to just taking a first look at everything, so that's always super helpful.
