

Save time with automated redaction

Don't waste hours redacting every document by hand, or even using off-the-shelf tools. Now you can race through redaction twice as fast with Datasite Diligence. Redacting sensitive content during due diligence has never been easier.

Four easy steps to redact—and two to unredact

Redact

1. Build the Datasite Diligence index and upload documents
2. Specify terms to be redacted
3. Datasite Diligence performs draft redactions across the filer room
4. Confirm draft redactions or modify at file level

Unredact

1. Select terms to be unredacted
2. Confirm to unredact at filer room or file level

“Redaction for Datasite Diligence, with its data room integration, reduces significantly the time it takes to manage redaction vs. using a third-party tool outside the data room.”

Corporate Paralegal,
Major UK Law Firm

“We estimate that Datasite Diligence’s redaction capabilities reduced by one third the time needed to redact vs. our current stand-alone tool.”

Analyst,
Major Global Investment Bank

Accelerate your deal and stay in control with automated redaction

Submit words and phrases to be redacted and see draft documents in seconds for your review. Keep redactions and your deal moving forward using the overview of all redacted documents on the files page.

- Redact words, phrases, and images at fileroom or individual file level
- Create lists of words or phrases for redaction
- Track redaction progress per word, easily
- See containing files for selected terms
- Select images for redaction using the area tool
- Track overall redaction process using the status page
- Apply redaction term list to each/all filerooms
- Monitor the marking process with quick and visible redactions
- Review redactions for selected files
- Preview draft redactions and confirm
- Confirm draft redactions for selected or all files
- Unredact all or selected files with a single click (and admin access)
