

Make better buy-side decisions, faster

Datasite
for Buy-Side M&A

Tired of messy, overly-manual sell-side reviews? Luckily, there's a better way. Find out how top buyers are creating centralized, repeatable processes from the comfort of their own data room.

10,000+
transactions annually

390,000+
buy-side reviewers

24/7/365
in-house support

GDPR/CCPA
compliant

Data gathered by Datasite Insights™ as of Dec 31st 2020

One Place For:

- Pipeline management
- Preliminary vetting
- Due Diligence
- Post Merger Integration (PMI)
- Strategic Repository

■ **Take charge** | Skip hours of checklist mapping by having the seller upload documents directly into your own VDR index. Invite and permission team members to streamline internal workflow. Leverage analytics to see how many documents each workstream has reviewed.

■ **Premium service** | A data room is only as good as the people supporting it. Experienced project managers are available for every transaction at no additional charge – 24/7/365 and fluent in up to 18 languages.

■ **Save time** | Stop the hunting and clicking. Lean on AI-enabled auto-categorization, document previews, and in-app document translation to sort through documents quickly. Miss nothing with OCR search down to the character level.

■ **Bolster team communication** | Avoid buy-side blunders. Easily create and surface key due diligence findings. Embed workstream trackers so nothing gets lost in the shuffle. Put critical deal milestones front and center. Comment directly on documents with @mentions and document linking.

■ **Assess progress instantly** | Don't ever be in the dark again. Know where your review stands at-a-glance on our buyside dashboard, so you can quickly action next steps. View workstream findings by status and priority. See tracker summaries, document updates, and comments in one place.
