# ACCELERATED REDACTION MANAGEMENT
## JUST BECAME FASTER

According to Merrill Corporation customer polling, over 75% of deals call for significant document redaction before due diligence can commence. Using non-VDR integrated tools, third-party redaction services, or even manual document mark-ups can slow your deal to a crawl.

Redaction for DatasiteOne Diligence reduces the tedium and pain of redaction, speeds the redacting process, and provides greater deal control - down to the word level - while keeping deal documents safe and secure. Now with automated redaction, DatasiteOne Diligence reduces redaction times by half as compared to manual redaction or the use of unintegrated tools.

### FAST AND EASY TO USE

+ Quicken the redaction process from set-up, and increase control and management of the overall redaction process

+ Build lists of words and phrases to redact, then see system generated-in-minutes draft redactions

### INCREASED SECURITY AND CONTROL

+ Secure and control information down to the word level and stay compliant with privacy regulations

+ Manage the overall redaction process more easily via a single status page listing the progress of all redaction documents

### KEEP YOUR DEAL MOVING

+ Easily track login activity of legal/redaction team to keep redaction and your deal moving forward

+ Eliminate the errors and time wasted moving files back and forth between non-integrated tools and the dataroom

+ Reduce dramatically the costs and time associated with using 3rd party consultants and advisors

# REDACTION FOR DATASITEONE DILIGENCE

Redaction for DatasiteOne Diligence is a powerful add-on capability to the DatasiteOne Diligence application. Our team worked closely with redaction experts to deliver a world-class redaction solution integrated within the best-in-class app for due dilligence - DatasiteOne Diligence. Redaction can be added to DatasiteOne Diligence either during initial customer set-up, or as an add-on.

## Key features include:

+ **Integration with DatasiteOne Diligence** - saves admins time and effort vs. using a separate, non-VDR integrated redaction tool by leveraging indexing, permissions, and secure document management.

+ **Redaction is streamlined** - admins can cursor-select words or phrases including punctuation. Admins can also select language and see document redaction history.

+ **Images can be redacted, too** - a simple selection tool calls out graphics, logos and even hand written notes for redaction.

+ **Fast search and selection** - powerful automated redaction finds listed words and phrases across filerooms and within individual documents quickly and allows users to confirm for all or some instances to be redacted.

+ **Stage redacted results** - toggle on/off redactions prior to final confirmation, where a new redacted document is created while copy of original is retained.

+ **Retain complete control** - documents show as "redacted" to admins and "readers" see only the document name. When legal clears previous redactions for reader access, easily revert to a previous version.

+ **Track redaction program** - see an organized view of all documents being redacted and status of each, so admins can prioritize redaction activities.

+ **Unredact with a single click** - as your deal progresses, unredacting can be handled in a single click for an individual file, select files or across an entire fileroom - in seconds - due to DatasiteOne Diligence integration.

"

*BEING ABLE TO REDACT 30% - 40% FASTER WITH DATASITEONE VS. OUR PREVIOUSLY MANUAL APPROACH, ENABLED US TO HIT OUR GO-LIVE DEADLINES AND MAINTAIN THE TRUST AND CREDIBILITY WITH PROSPECTIVE BUYERS AND THEIR ADVISORS."*

**Corporate Paralegal,**
Major UK Law Firm

*WE ESTIMATE THAT DATASITEONE DILIGENCE'S REDACTION CAPABILITIES REDUCED BY ONE THIRD THE TIME NEEDED TO REDACT VS. OUR CURRENT STAND-ALONE TOOL."*
